User Story

As an admin, I want to log in securely so that only authorized administrators can access the Partner Management Panel.

As an admin, I want to log out so that my account cannot be accessed after I leave the system.

As an admin, I want to view the partner dashboard so that I can monitor the overall partner business.

As an admin, I want to search and filter vendors so that I can quickly find a specific partner.

As an admin, I want to register a vendor manually so that I can directly onboard a business partner.

As an admin, I want to enter the vendor's business information so that the partner's company details are stored.

As an admin, I want to enter vendor contact information so that SPOTX can communicate with the partner.

As an admin, I want to record the authorized person so that SPOTX knows who represents the vendor.

As an admin, I want to record vendor KYC and tax information so that the partner can be properly verified.

As an admin, I want to record vendor bank information so that commissions can later be paid to the correct account.

As an admin, I want to define the vendor's commission during registration so that the commercial agreement is stored.

As an admin, I want to create the vendor login so that the vendor can access the Partner Panel.

As a vendor, I want to register my business through the SPOTX website so that I can apply to become a partner.

As a vendor, I want to submit my business details so that SPOTX can understand my company.

As a vendor, I want to submit my contact details so that SPOTX can contact me.

As a vendor, I want to provide authorized-person details so that SPOTX knows my company representative.

As a vendor, I want to upload my KYC and business documents so that SPOTX can verify my business.

As a vendor, I want to provide bank details and a cancelled cheque so that SPOTX can later pay my commission.

As a vendor, I want to accept the partner terms so that I can submit my application.

As a vendor, I want to receive confirmation after registration so that I know my application was submitted.

As an admin, I want to see pending vendor applications so that I can review new partner requests.

As an admin, I want to view complete vendor information so that I can evaluate the business.

As an admin, I want to verify vendor documents so that only genuine businesses become partners.

As an admin, I want to request additional information from a vendor so that incomplete applications can be corrected.

As an admin, I want to reject an application with a reason so that the vendor understands why it was rejected.

As an admin, I want to approve a vendor so that the vendor can become an active partner.

As an admin, I want to define a commission for a vendor so that the vendor receives an agreed amount from CMS subscriptions.

As an admin, I want to configure commission for a manually registered vendor during registration so that the agreement is saved immediately.

As an admin, I want to configure commission for a self-registered vendor after closing the deal so that the commercial agreement can be recorded.

As an admin, I want to change the commission rate for future business so that new customer agreements can use the new rate.

As the system, I want to preserve the old commission rate for existing customers so that previous agreements are not changed.

As the system, I want to store a commission snapshot when payment is made so that historical commission cannot change.

As the system, I want to generate a unique partner referral code after vendor approval so that customers can be associated with the correct vendor.

As a vendor, I want to view my partner referral code so that I can share it with customers.

As a vendor, I want to copy my referral code/link so that I can easily share it.

As an admin, I want to deactivate a referral code when required so that it cannot be used further.

As a vendor, I want to register an customer directly so that the customer becomes my associated customer.

As an customer, I want to register using a partner referral code so that I can be associated with the vendor who provided my SPOTX CMS.

As the system, I want to automatically map the customer to the vendor associated with the referral code so that commission goes to the correct vendor.

As the system, I want to prevent an customer from being associated with multiple vendors so that commission conflicts are avoided.

As a vendor, I want to view all customers associated with me so that I can manage my customer relationships.

As a vendor, I want to search customers so that I can quickly find a customer.

As a vendor, I want to filter customers by subscription status so that I can identify active, trial and expired customers.

As a vendor, I want to view an customer's details so that I can understand their SPOTX account and subscription.

As a vendor, I want to see how the customer was registered so that I know whether I registered them or they used my code.

As an customer, I want to receive a one-month free trial from my registration date so that I can test SPOTX CMS.

As the system, I want to track trial status so that the customer knows whether their trial is active or expired.

As an customer, I want to receive a notification before my trial expires so that I have time to purchase a subscription.

As the system, I want to prevent trial abuse so that the same customer cannot repeatedly receive free trials.

As an customer, I want to choose the number of screens so that I can purchase the required CMS subscription.

As an customer, I want to see the total subscription price before payment so that I know what I will pay.

As an customer, I want to purchase a subscription after my trial ends so that I can continue using SPOTX.

As a vendor, I want to see the subscription status of my customers so that I know which customers are active.

As an customer, I want to pay through a payment gateway so that I can activate my CMS subscription.

As the system, I want to record successful payments so that subscription and commission can be processed.

As the system, I want to handle failed payments so that unsuccessful transactions do not activate subscriptions.

As the system, I want to handle duplicate payment callbacks so that the same payment is not processed twice.

As the system, I want to handle refunds so that subscription and commission records remain accurate.

As the system, I want to calculate commission after successful subscription payment so that the vendor receives the correct earnings.

As the system, I want to store the commission rate used for a transaction so that historical records remain accurate.

As the system, I want to store the screen count used for commission calculation so that the calculation can be audited.

As the system, I want to store the final commission amount so that it does not need to be recalculated later.

As a vendor, I want to see commission generated from each customer so that I can track my earnings.

As the system, I want to hold commission for a defined period so that refunds can be handled before payout.

As the system, I want to release eligible commission after the hold period so that it becomes payable to the vendor.

As the system, I want to reverse commission when a subscription is refunded so that the vendor does not receive invalid commission.

As an admin, I want to see reversed commissions so that I can audit partner earnings.

As a vendor, I want to see my total customers so that I can understand my customer base.

As a vendor, I want to see active subscriptions so that I can understand my current CMS customers.

As a vendor, I want to see total screens sold through my partnership so that I can track my business volume.

As a vendor, I want to see total commission earned so that I can understand my overall earnings.

As a vendor, I want to see pending commission so that I know what is still waiting for release.

As a vendor, I want to see paid commission so that I know how much money I have received.

As a vendor, I want to see recent transactions so that I can monitor recent partner activity.

As an admin, I want to see vendor payout-eligible commissions so that I can process payments.

As an admin, I want to create a vendor payout so that approved commission can be paid.

As an admin, I want to record the bank transaction reference so that the payout can be audited.

As a vendor, I want to see my payout history so that I can track payments received from SPOTX.

As a vendor, I want to see payout status so that I know whether my commission is pending, processed or failed.

As a vendor, I want to view my business profile so that I can see the information registered with SPOTX.

As a vendor, I want to update permitted business information so that my profile remains current.

As a vendor, I want to view my verified KYC information so that I can confirm my documents are registered correctly.

As a vendor, I want to update bank details when necessary so that future payouts go to the correct account.

As a vendor, I want to receive notification when my customer registers so that I know a new customer has joined through my partnership.

As a vendor, I want to receive notification when my customer purchases a subscription so that I know commission has been generated.

As a vendor, I want to receive notification when commission becomes payable so that I know I have earnings available.

As a vendor, I want to receive notification when my payout is processed so that I know the payment was made.

As a vendor, I want to receive important account notifications so that I know about verification, suspension or other partner-account changes.

As a vendor, I want to access SPOTX brochures so that I can present the product to customers.

As a vendor, I want to access SPOTX pricing material so that I can explain the product to customers.

As a vendor, I want to access product presentations so that I can demonstrate SPOTX.

As a vendor, I want to access installation guides so that I can deploy screens correctly.

As a vendor, I want to contact SPOTX support so that I can get help with partner-related issues.

As a vendor, I want to track my support requests so that I know their status.

As an admin, I want to respond to partner support requests so that vendor issues can be resolved.

As the system, I want to validate vendor email addresses so that duplicate accounts are prevented.

As the system, I want to validate PAN/GST information so that incorrect KYC information is not accepted.

As the system, I want to validate uploaded documents so that unsafe or unsupported files cannot be uploaded.

As the system, I want to protect vendor bank information so that sensitive financial data is secure.

As the system, I want to prevent unauthorized vendor access so that one vendor cannot see another vendor's data.

As the system, I want to maintain an audit history of important partner actions so that changes can be tracked.

Tasks	Status
Create admin login with email/username and password.	To Do
Add logout functionality and session/token invalidation.	To Do
Create dashboard with total vendors, pending vendors, active vendors, customers, subscriptions, commissions and payouts.	To Do
Add vendor search, status filter and date filter.	To Do
Create vendor registration with business, contact, authorized person, KYC, tax, bank and commission information.	To Do
Add Vendor Name (Company/Business Name), Business Type, Business Registration Number, Address, City, State, Pincode, Country and Website.	To Do
Add Business Email and Phone Number.	To Do
Add Authorized Person Name and Designation.	To Do
Add PAN, GST, MSME/Udyam and document uploads.	To Do
Add Account Holder, Account Number, Bank, Branch, IFSC, Account Type and Cancelled Cheque.	To Do
Add commission type, percentage/per-screen rate and effective date.	To Do
Create vendor login and account activation.	To Do
Create vendor registration page.	To Do
Add business information fields.	To Do
Add business email and phone number.	To Do
Add authorized person name and designation.	To Do
Add PAN, GST, MSME and business registration document uploads.	To Do
Add bank details and cancelled cheque upload.	To Do
Add Terms, Privacy Policy, Partner Agreement and information confirmation.	To Do
Create registration confirmation and pending-verification status.	To Do
Create pending vendor list.	To Do
Create vendor detail page with business, KYC, bank and document information.	To Do

Add document verification status.	To Do
Add document/information request functionality.	To Do
Add rejection reason and rejection status.	To Do
Add vendor approval action and activation.	To Do
Create commission agreement with commission type, rate, per-screen amount and effective date.	To Do
Add commission configuration to admin vendor registration.	To Do
Add commission after vendor verification.	To Do
Add new commission agreement with effective date.	To Do
Map customer/subscription to applicable commission agreement.	To Do
Save rate, per-screen amount, screen count and commission amount.	To Do
Generate unique code for each approved vendor.	To Do
Add referral section in Partner Panel.	To Do
Add copy button and referral link.	To Do
Add referral-code status management.	To Do
Create customer registration form inside Partner Panel and automatically map vendor.	To Do
Add referral code to customer registration and validate it.	To Do
Create vendor-customer mapping after successful referral validation.	To Do
Add duplicate attribution validation.	To Do
Create customer list.	To Do
Add search by customer/company/email.	To Do
Add subscription-status filters.	To Do
Create customer detail page.	To Do
Display registration source.	To Do

Automatically create trial start and end dates.	To Do
Add trial status and expiry logic.	To Do
Create trial-expiry notification.	To Do
Add duplicate account/trial validation.	To Do
Create screen quantity selection.	To Do
Create dynamic price calculation.	To Do
Create subscription checkout.	To Do
Display subscription status and dates.	To Do
Integrate payment gateway.	To Do
Create payment record with transaction ID and amount.	To Do
Add payment failure handling.	To Do
Add transaction-idempotency validation.	To Do
Add refund tracking.	To Do
Retrieve applicable vendor commission and screen count.	To Do
Save commission rate snapshot.	To Do
Save screen count in commission record.	To Do
Save final commission amount.	To Do
Create customer-wise commission view.	To Do
Add commission hold status and hold-until date.	To Do
Create commission release process.	To Do
Create commission reversal logic.	To Do
Add reversal records/history.	To Do

Add total customer count.	To Do
Add active subscription count.	To Do
Calculate total subscribed screens.	To Do
Add total commission card.	To Do
Add pending commission card.	To Do
Add paid commission card.	To Do
Add recent subscriptions, payments and commissions.	To Do
Create payout-eligible commission list.	To Do
Create payout record and amount calculation.	To Do
Add transaction reference and payout date.	To Do
Create payout history.	To Do
Add payout status.	To Do
Create profile page.	To Do
Add profile editing.	To Do
Display KYC/document status.	To Do
Create bank-change request and admin verification process.	To Do
Create customer-registration notification.	To Do
Create subscription notification.	To Do
Create commission notification.	To Do
Create payout notification.	To Do
Create account-status notifications.	To Do
Add brochure resources.	To Do

Add pricing resources.	To Do
Add presentation/demo resources.	To Do
Add installation documentation.	To Do
Create support request form.	To Do
Create support-ticket list and status.	To Do
Create admin support management.	To Do
Add email validation and duplicate checking.	To Do
Add validation rules.	To Do
Add file type and size validation.	To Do
Implement access control and secure storage/display.	To Do
Implement partner-level data authorization.	To Do
Add audit logs for commission, vendor status, payouts and important changes.	To Do

Priority	Testing
High	Test valid login, invalid credentials and empty fields.
